1) Determine whether the relation is a function.

State the domain and range for each relation.

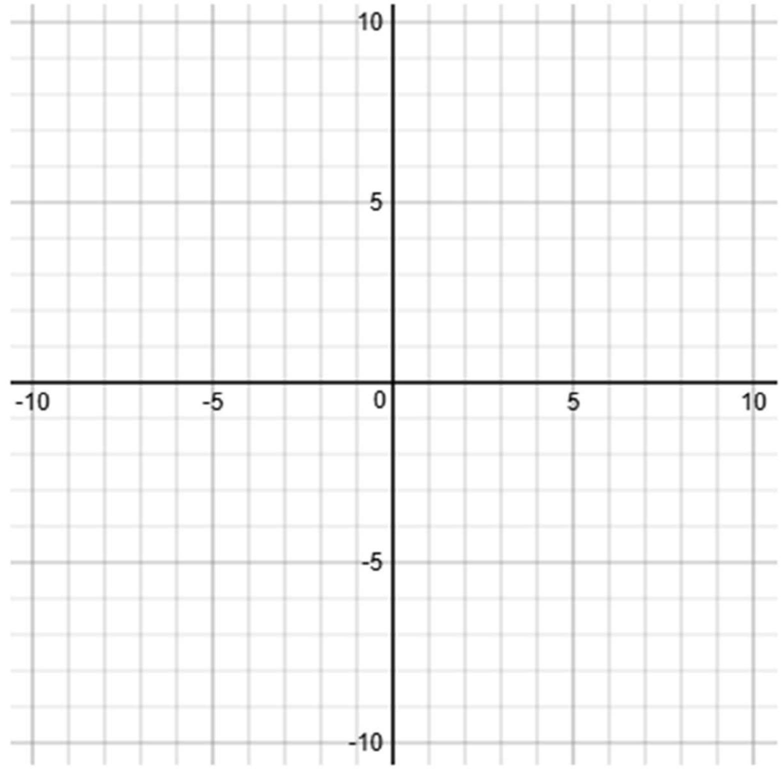
$\{(2,3),\ (-2,3),\ (1,7),\ (6,8),\ (-3,5)\}$

a) Plot the points.

b) domain = ____________________

c) range = ______________________

d) Relation is or is not a function?



2) Determine whether the relation is a function.
State the domain and range for each relation.

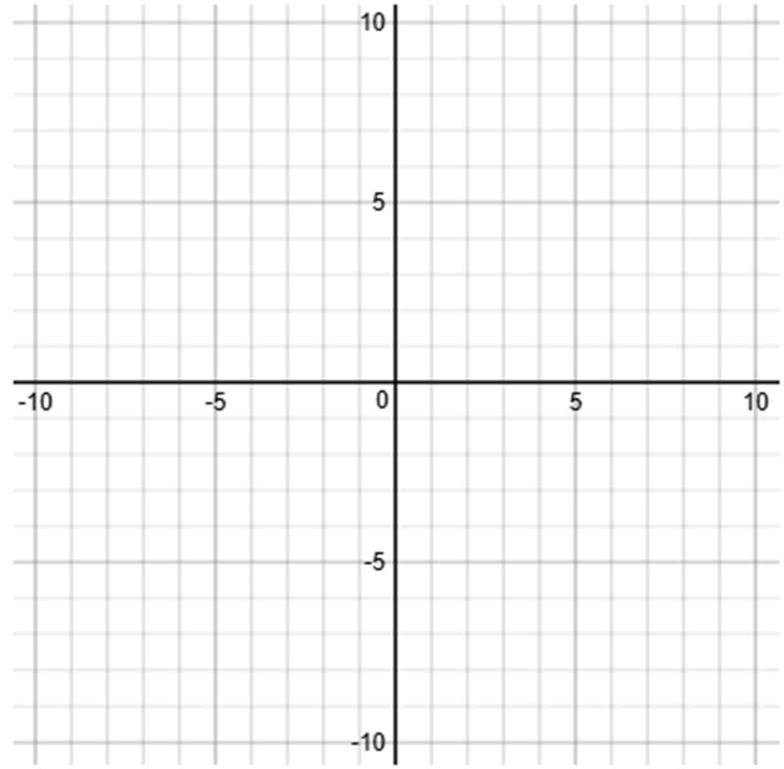
$\{(2,1),\ (-3,6),\ (2,6),\ (8,1),\ (-9,5)\}$

a) Plot the points.

b) domain = ____________________

c) range = ______________________

d) Relation is or is not a function?



3) Determine whether the relation is a function.

State the domain and range for each relation.

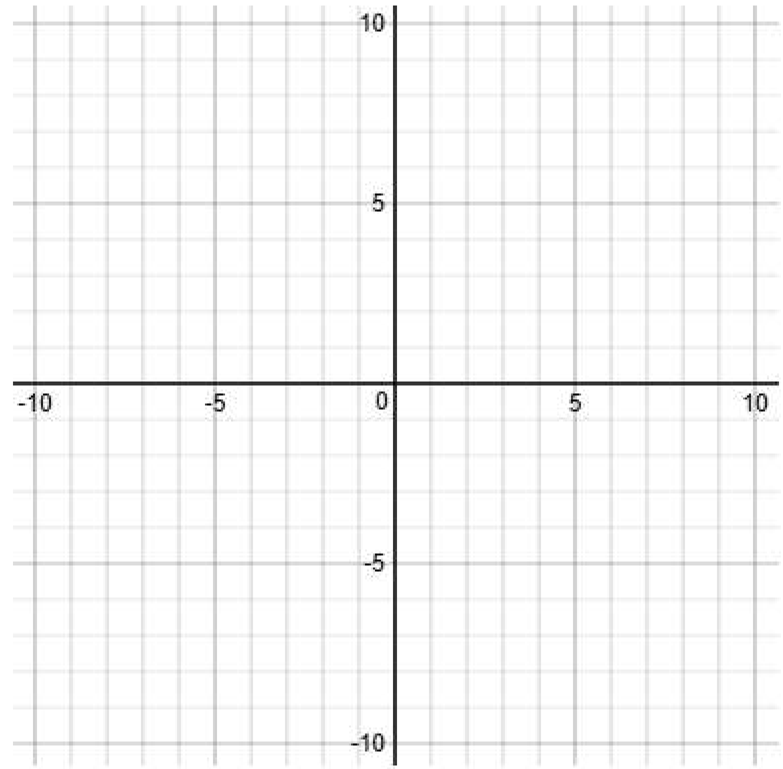
$\{(4,3),\ (4,3),\ (4,7),\ (4,8),\ (4,5)\}$

a) Plot the points.

b) domain = ____________________

c) range = ______________________

d) Relation is or is not a function?



4) Determine whether the relation is a function.

State the domain and range for each relation.

$\{(2,5),\ (-2,5),\ (1,5),\ (6,5),\ (-3,5)\}$

a) Plot the points.

b) domain = ____________________

c) range = ______________________

d) Relation is or is not a function?
