

Lesson 12: Dividing Polynomials

Criteria	Beginning (1)	Developing (2)	Proficient (3)	Mastery (4)
Setup	Incorrectly identifies Dividend/Divisor.	Sets up, but forgets placeholder terms.	Sets up correctly, minor sign error.	Correct setup, including missing terms.
Process	Method is incorrect.	Misunderstands dividing/subtracting steps.	Minor calculation errors.	Follows Algorithm (Divide, Multiply, Subtract, Bring Down).
Remainder	Cannot identify.	Incorrectly calculates.	Identifies correctly, but misses format.	Correctly calculates and formats $R(x)$.
