

Lesson 14: Rational Functions

Criteria	Exceptional (4)	Proficient (3)	Developing (2)	Beginning (1)
Factoring & Simplification	Factoring is accurate and complete, reducing expressions correctly.	Minor errors in factoring but overall understanding is solid.	Can identify need to factor but fails to simplify correctly.	Little to no ability to factor.
Asymptotes & Intercepts	Accurately finds all VA, HA/slant, intercepts, and holes.	Identifies most features, with minor errors in calculation.	Identifies some features, but confuses VA and HA.	Incorrect or missing asymptotes/intercepts.
Graphing & Behavior	Graph shows clear behavior, correct asymptotes, and trends.	Graph is mostly correct with minor plotting errors.	Graph is missing key features (e.g.,holes) or misrepresents behavior.	Graph is inaccurate or missing.
Application & Modeling	Model perfectly fits the problem; thorough explanation.	Model fits, with good explanation and minor flaws.	Model is provided, but lacks proper interpretation.	Incorrect model, no application shown.
