

Lesson 15: Exponential Functions and Compound Interest

Criteria	Exemplary (4)	Proficient (3)	Developing (2)	Beginning (1)
Graphing & Key Features	Graph is plotted accurately, including y-intercept, horizontal asymptote, and consistent scale. Clearly labels growth/decay.	Graph is generally accurate with correct asymptotic behavior, but with minor plotting errors or lack of labels.	Graph shows exponential shape but fails to show accurate asymptotes or intercepts.	Graph is incorrect (e.g., looks linear) or plotted erroneously.
