

Lesson 18: Exponential Equations and Logarithmic Equations

Criteria	Exemplary (4)	Proficient (3)	Developing (2)	Beginning (1)
Solving Exponential equations	Solves $y = a \cdot b^x$ for x or y accurately. Shows all steps clearly.	Solves equation correctly, but steps are disorganized.	Minor algebraic errors in solving for the exponent.	Unable to solve for unknown variables.
Solving logarithmic equations	Solves $\log_b x = y$ for x or y accurately. Shows all steps clearly.	Solves equation correctly, but steps are disorganized.	Minor algebraic errors in solving for the exponent.	Unable to solve for unknown variables.
