

Lesson 23: Representation of Functions by Power Series

Assessment Rubric

Criteria	Proficient (3-4 pts)	Developing (1-2 pts)	Beginning (0 pts)
Representation	Correctly identifies and substitutes into standard form; accurate algebraic manipulation.	Minor algebraic errors or incorrect substitution formula used.	Incorrect method; cannot identify geometric/power series form.
Convergence	Correct R and endpoint analysis, including interval notation.	Correct R, but fails to test or correctly include/exclude endpoints.	No attempt or entirely incorrect method for finding R.
Notation	Perfect use of Σ notation, index n, and variables.	Minor notation errors (e.g., wrong starting index).	Confuses series with sequences or integral notation.
Expansion	Accurately expands series to 3+ terms with correct coefficients.	Incorrect power or factorial in the expansion.	Fails to expand the series.
