

Lesson 26: Conics Sections - Ellipse

Criteria	4 - Exemplary	3 - Proficient	2 - Developing	1 - Beginning
Equation Accuracy	All equations match the graph perfectly with no errors.	1–2 minor errors in equation calculations.	3–4 errors; connection between graph and equation is weak.	Majority of equations are incorrect.
Graphical Features	Center, foci, and vertices are correctly identified and labeled.	Most key features labeled correctly.	Several key features are missing or incorrect.	Graph is inaccurate or missing labels.
Application	Real-life application (e.g., orbit) is clearly explained and modeled.	Real-life application is present but lacks detail.	Weak or vague connection to real-life usage.	No real-life application shown.
Creativity/Neatness	Exceptional, creative use of ellipse in a design; very neat.	Creative, but minor issues with neatness.	Basic, with limited, sloppy presentation.	No effort in presentation or creativity.
