

Lesson 29: Differentiation and Parametric Equations

Criteria	Exemplary (4)	Proficient (3)	Developing (2)	Beginning (1)
Technique	Derivative/Parametric, rule applied with no errors.	Minor errors in derivative/parametric rule application.	Major errors in applying derivative/parametric rules.	Little to no understanding of the required technique.
Conceptual Understanding	Deep understanding shown; identifies best method for solving.	Good understanding; solves using standard methods.	Partial understanding; struggles to choose the correct method.	Lack of conceptual understanding.
Accuracy	Final answers are exact or rounded to required precision.	Minor arithmetic errors but correct process.	Several errors lead to incorrect conclusions.	Incorrect answer with wrong method.
Interpretation/Justification	Clear, logical, and complete justification of results.	Generally clear, with minor flaws in reasoning.	Incomplete or unclear justification of results.	No explanation provided.
